Build Python Code

Date	15 November 2022
Team Id	IBM-Project-PNT2022MID48802
Project Name	AI-POWERED NUTRITION ANALYZER FOR FITNESS ENTHUSIASTS
Maximum Marks	4 MARKS

Importing Libraries

The first step is usually importing the libraries that will be needed in the program.

Importing the flask module into the project is mandatory. An object of theFlask class is our WSGI application. Flask constructor takes the name of thecurrent module (_name_) as an argument Pickle library to load the model file.

from flask import Flask,render_template,request # Flask-It is our framework which we are going to use to run/serve our application. #request-for accessing file which was uploaded by the user on our application. import os import numpy as np #used for numerical analysis from tensorflow.keras.models import load_model#to load our trained model from tensorflow.keras.preprocessing import image import requests
